

A n n e x 1

This document specifies some information relating to the application of PCR 001-15 rev. 2.1. This document is a part of PCR.

Section 1

1 PREMISE

This Annex is an integral part of the PCR 001-15 rev. 2.1, published on www.epditaly.it. This document specifies some important information relating to the application of PCR in the context of the verification, validation and publication of EPDs in the EPDItaly system, in the construction sector.

2 APPLICABLE STANDARD

Today, the construction sector EPD verification must be carried out by the Certification Body with reference to the requirements contained into the standard EN 15804: 2012 + A1: 2013, *Sustainability of construction works - Environmental Product Declarations - Core rules for the product category of construction products*.

All the times that the PCR 001-15 rev. 2.1 refers to the standard EN 15804, this reference must be understood as EN 15804: 2012 + A1: 2013. Therefore the sentence "*As regards undated references, the updated edition shall apply*", is not applicable to the standard EN 15804: 2012 + A1: 2013.

Following the entry into force of the EN 15804: 2012 + A2: 2019 Standard, the EPDItaly documentation review process (Regulation and PCR) will start. A transition period will also be established, which will end on 31/10/2022, during which it will be possible for the manufacturer to use, at his choice, the Regulation rev. 4 and EN 15804: 2012 + A1: 2013, by PCR 001-15 rev. 2.1, or the new Regulation and PCR (as soon as available) and the new Standard EN 15804: 2012 + A2: 2019.

Similarly, all the standards contained into the PCR document have to be referred to the applicable Standard in force at the date of the PCR itself and/or its revision.
